

IDEAS

Healthcare Resource Distribution and Population by State

WONG JIA XUAN
33411808
SHEET 1

Population by state

- age
- gender
- collected date
- ethnicity
- population
- state

Utilities by state

- number of non-icu bed
- number of icu bed
- number of ventilator
- Non-ICU bed utilisation percentage
- ICU-bed utilisation percentage
- Hospital list by state

Bin Maps

Isotype Dot Plot

Diverging bar chart

Pie chart by state

Map

① Choropleth

② Proportional Symbol Map

- num of non-icu bed
- num of icu bed
- num of ventilator
- population
- num of hospital

Line chart

Grouped bar chart

CATEGORIZE

- Proportional Symbol Map with num of non-icu bed, icu bed, ventilator, hospital is same as grouped bar chart or Isotype Dot Plot
- Grouped bar chart is same with Isotype Dot Plot
- For the chart needs to show different categories
 - ↳ the states are too many :13
 - ↳ focus on elderly group population

COMBINE & REFINE

- Show the top 5 states which have highest elderly population for grouped bar chart or Isotype dot Plot
- Remove dot of num of ... from Proportional Symbol Map

FILTER

- Bin maps might not suitable as the data didn't provide district
- Too crowded to show too much information in Proportional Symbol Map
 - ↳ Separate the diagram
 - ↳ zoom in certain area (Pierogayad)

QUESTION

1. Does the idea help readers to understand the relationships between population and healthcare resource
2. Does the map indicate the data with meaningful insight without misleading?

SHEET 2

FOCUS:

1. Proportional Symbol Map

- Show the population of different states along with year

2. Diverging Bar Chart

- Show the population of different age categories according by the states

3. Isotype dot plot

- Show the number of related devices by state with symbol to have a overview of the number of devices

4. Line graph

- Show the top 5 states with highest elderly population to show the trends of potential risk of resources distribution

OPERATION

- Interaction: Hover over a state to see a tooltip showing:
 - Population
 - State
- Filters: Includes filters to show the certain Year data

DISCUSSION

PROS:

- Targeted insights: Highlights the age population and the number of devices.
- Provides year filter to have specific year data

CONS:

- Not too much information about the healthcare resource, the data are too focus on population
- Line graph might double encode the age categories information with diverging bar chart

LAYOUT

WONG JIA XUAN

SHEET 3

FOCUS:

To show the elderly population and the healthcare resources

1. Proportional Symbol Map

- Show the population of current year as the utilisation data is real time data

2. Choropleth percentage

- To show the utilisation of different healthcare devices by states

3. Bar chart

- To show the number of hospital by state

4. Line chart

- To show the trends of elderly population along with time

OPERATION

• Interaction: For maps, hover a state too see tooltips:

- Proportional Symbol Map:
 - Population
 - State

- Choropleth:
 - Percentage of the devices
 - State

• Filters: For choropleth

- To select certain devices utilisation percentage

• Colour-blind friendly

DISCUSSION

PROS:

- Show adequate amount of charts from population and healthcare resource data
- Targeted insights:
 - Highlights the elderly population and the resources of the healthcare devices.

CONS:

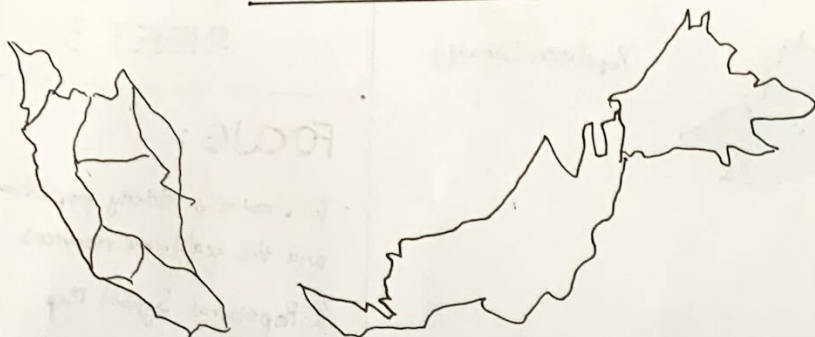

- No text description and title lead to misunderstanding or doubt about the chart
- Bar chart might be too crowded as there is 13 states.

SHEET 4

Population
in Percentage
of 2024

Description

Utilization in
Percentage

Utilities

Sum of population
of each age group

Description

Description

FOCUS

1. Choropleth
 - Focus on the elderly group population with total population by state
2. Choropleth
 - Show the utilities utilisation percentage by states
3. Horizontal stacked bar chart
 - Show the total population and the population of each age category
4. Bar chart
 - Show the number of different devices by states

OPERATION

- Highlight the highest and lowest number in bar chart.

Interaction: Tooltips

1. Choropleth
 - : States
 - : Percentage
2. Choropleth
 - : States
 - : Percentage

Filters: Includes filters to show the states

DISCUSSION

PROS:

- Easy to implement and straightforward
- Simple and easy to observe
- Show adequate amount of graph from different datasets

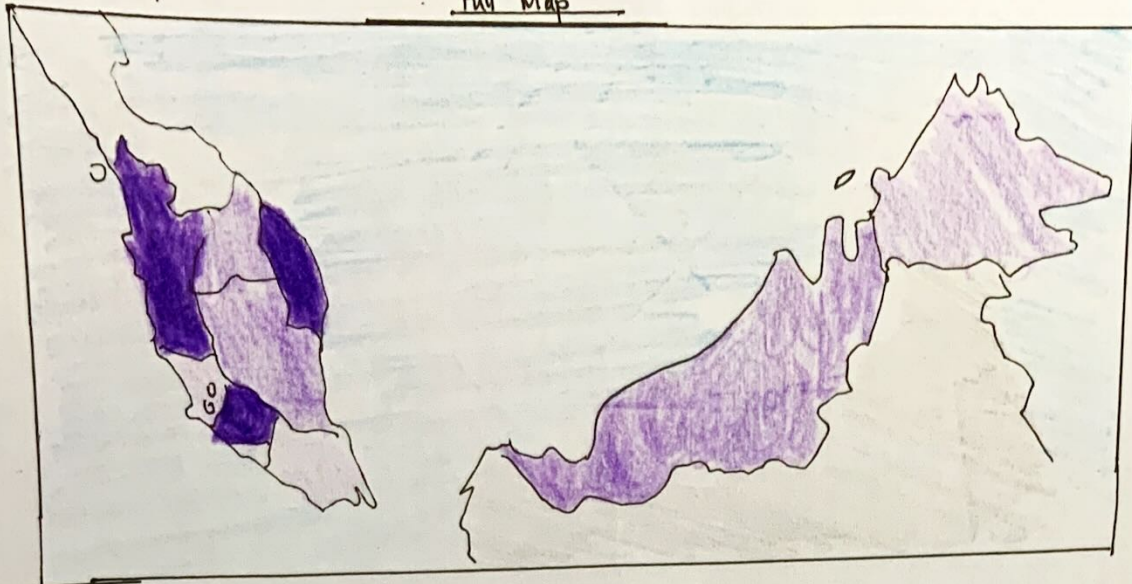

CONS:

- Oversimplified the data for choropleth of Population for elderly only

SHEET 5

Utilisation (%)

FOCUS

- Provide a comprehensive of overall healthcare & devices utilisation and the population by states.
- Allow readers to select specific states, devices or year to explore their the growth of elderly or the utilisation of healthcare device.

OPERATION

- Interaction:
 - Hover on the choropleth map: tooltips
 - Hover on the bar chart: tooltips
 - Hover on the population pyramid: tooltips
 - Hover on the donut chart: tooltips
- Tooltips: Show the detailed maps information or other information
- Filters:
 - Device: Dropdown to select different devices to show their utilisation on map.
 - State: Dropdown to select different state to show the population data
 - Year: A slider to select the year from 2024 to 2024.
- Color scheme:
 - Consistent colour across all charts.
 - Color blind friendly.
